DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 3, 5-11, and 13-17 are allowed.
2. The following is an examiner's statement of reasons for allowance: This invention deals with a twisted pair cable wherein the first conductor of the first assembly is closer to a second conductor of the second assembly than an outer surface opposite the conductors, wherein the outer edge of the first assembly is farther from the first conductor than the inner edge of the first assembly over the length of the pair (claim 1). This invention also deals with a twisted pair cable wherein the first conductor of the first assembly is closer to a second conductor of the second assembly than an outer surface opposite the conductors along a length of the pair, wherein the outer edge of the first assembly is defined by a surface of the first assembly farthest from the second conductor assembly of the same pair (claim 3). This invention also deals with a twisted pair cable comprising an method of making a twisted pair cable comprising an extrudable polymer having a modulus of elasticity greater than 64 KPSI at room temperature and an extrudable elastomer having a modulus of elasticity lower than 35 KPSI at room temperature (claim 16). This invention also deals with a twisted pair cable comprising two plurality of pairs, wherein each pair comprises two assemblies, wherein a second assembly comprises an inner edge of the second assembly defined by a surface of the second assembly closest to a first assembly in the same pair and an outer edge of the of the second assembly defined by a surface of the second assembly

Art Unit: 2831

farthest from the first assembly in the same pair, wherein the outer edge of the second assembly being farther from the second conductor than the inner edge of the second assembly over the length of the pair (claim 17). The above stated claim limitations, in combination with other claim limitations, are not taught or suggested by the prior art of record. Claims 5-11 and 13-15 are depended upon allowed claim 1, and therefore are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

3. Applicant's arguments filed April 8, 2004 have been fully considered and they are persuasive. Specifically, the applicant's argument that Brorein doesn't teach or suggest a twisted pair wherein a first conductor is closer to a second conductor of a second assembly than to an outer surface opposite the conductors over the length of the twisted pair, is persuasive and therefore the claims have been allowed.
